This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

NATIONAL FOREST RESERVATION COMMISSION,
Washington, D. C., November 7, 1919.

The SECRETARY OF THE TREASURY.

SIR: I have the honor to submit herewith for transmission to Congress an estimate for an appropriation needed for the acquisition of additional lands at the headwaters of navigable streams under the provisions of the act of March 1, 1911 (36 Stat., 961), entitled:

An act to enable any State to cooperate with any other State or States, or with the United States, for the protection of the watersheds of navigable streams, and to appoint a commission for the acquisition of lands for the purpose of conserving the navigability of navigable rivers.

Section 4 of the act of March 1, 1911, established the National Forest Reservation Commission consisting of the Secretary of War, the Secretary of the Interior, the Secretary of Agriculture, and two Members of the Senate and two Members of the House of Representatives. The present personnel of the National Forest Reservation Commission is:

Hon. Newton D. Baker, Secretary of War.
Hon. Franklin K. Lane, Secretary of the Interior.
Hon. David F. Houston, Secretary of Agriculture.
Hon. John Walter Smith, Senator from Maryland.
Hon. Peter G. Gerry, Senator from Rhode Island.
Hon. Willis C. Hawley, Member of Congress from Oregon.
Hon. Gordon Lee, Member of Congress from Georgia.

At a meeting of this commission regularly held October 31, 1919, after full consideration of the situation, it was decided to recommend to Congress a continuation of appropriations for a period of five years, beginning with the fiscal year 1921, at a rate of $2,000,000 per year.

The following wording is suggested for a bill making the needed appropriation:

A BILL Making an appropriation to be expended under the provis ions of the act of March 1, 1911 (36 Stat. 961), entitled "An act to enable any State to cooperate with any other State or States, or with the United States, for the protection of the watersheds of navigable streams, and to appoint a commission for the acquisition of lands for the purpose of conserving the navigability of navigable rivers," as amended.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That there is hereby appropriated out of any moneys in the United States Treasury not otherwise appropriated to be expended under the provisions of the act of March 1, 1911 (36 Stat., 961), as amended by the acts of March 4, 1913 (37 Stat., 855), and June 30, 1914 (38 Stat., 441), for the fiscal year ending June 30, 1921, $2,000,000; June 30, 1922, $2,000,000; June 30, 1923, $2,000,000; June 30, 1924, $2,000,000, and June 30, 1925, $2,000,000, in all, $10,000,000, to be available until expended.

Section 3 of the act of March 1, 1911, appropriated $11,000,000 for the acquisition of lands at the headwaters of navigable streams, the appropriation to expire June 30, 1915. The time limit was subsequently extended. The termination of work for the fiscal year 1919 in a large measure completed the expenditure of the original appropriation. The following table shows the acreage of the land approved for purchase by years since 1911 and the average price paid each year for such lands, together with the average price for all lands:

Digitized by Google

Year.	Acreage.	Average price.
1912	222,820	$5.99
1913	415,603	4.75
1914	353,634	5.10
1915	244,173	5.90
1916	54,898	5.96
1917	175,463	4.86
1918	185,199	5.12
1919	103,355	5.35
	1,768,927	5.30

The following additional information is taken from the Annual Report of the National Forest Reservation Commission to Congress for the fiscal year 1919:

Since no additional appropriation was requested for the fiscal year 1919 and only the balance of previous appropriations was available for expenditure, the commission, even after the signing of the armistice, followed the same conservative policy as during the war in authorizing the purchase only of such lands as blocked in and tended to solidify the Government's holdings. Even with this restricted policy considerable more land which filled the conditions required for purchase was offered than could be acquired with the moneys which were available.

It is believed that the results of the expenditure of the $11,000,000 carried by the original act show that purchases have been made judiciously and to the financial advantage of the Government. A considerable proportion of the lands which are being acquired are closely cut over or burned and little or no returns therefrom can be expected for many years. Notwithstanding this the timber on such of these lands as bear merchantable forests has so greatly appreciated in value that the purchased forests are now worth much more than the price paid therefor. This seems to show that the forests acquired primarily for watershed protection can become profitable investments without in any way jeopardizing their protective function, and at the same time can contribute materially in the near future to the timber needs of the country by furnishing a continuous supply of hardwood and spruce timber. It is believed that it will be only a few years before the present acreage of purchased forests will annually yield in excess of half a billion board feet of timber, in addition to large amounts of pulpwood and tannic acid stock. With this in view, future purchases should be along two lines—the establishment of new areas and the completion, extension, and solidification of existing purchase areas.

In order to carry out this policy it is recommended that an appropriation of $10,000,000 be made covering a five-year period with $2,000,000 a year, beginning with the fiscal year 1921, an appropriation of $600,000 having been made for the fiscal year 1920. A continuing appropriation of this kind permits the personnel of the organization which has now been developed for appraisal, survey, and title work to be held together. There is a considerable cost in efficiently training men for this work and the uncertainty of continuous employment results in unrest among the employees who after several years of training have little difficulty in obtaining in another branch of the Government service or outside the Government service positions which seem to assure greater permanency or are financially more advantageous. In addition to this feature negotiations are more efficiently carried on with a continuing appropriation, it being often advisable to continue negotiations for several years in order to agree in a price advantageous to the Government.

With this appropriation it is expected that it will be possible to acquire approximately 1,500,000 acres of timberland or potential timberland on the headwaters of navigable streams.

Respectfully,

NEWTON D. BAKER,
President National Forest Reservation Commission.

BY ORDER OF THE PRESIDENT.

DEFICIENCY APPROPRIATION FOR THE PUBLIC HEALTH SERVICE.

LETTER

FROM

THE SECRETARY OF THE TREASURY,

TRANSMITTING

A DEFICIENCY ESTIMATE OF APPROPRIATIONS REQUIRED BY THE UNITED STATES PUBLIC HEALTH SERVICE FOR URGENT EMERGENCY EXPENDITURES.

DECEMBER 1, 1919.—Referred to the Committee on Appropriations and ordered to be printed.

TREASURY DEPARTMENT,
Washington, November 28, 1919.

SIR: I have the honor to transmit, for the action of Congress, a deficiency estimate of appropriations required by the United States Public Health Service for urgent emergency expenditure as follows:

For the purchase and installation of furniture and equipment for the new additions to the Hygienic Laboratory, Washington, D. C..... $30,000

This estimate was originally submitted to the President of the Senate for inclusion in the first urgent deficiency bill, which had already been acted on by the House, and was under consideration in the Senate. The item reached the Senate, however, too late to be included in the bill.

The necessity for these emergency expenditures is set forth in a communication from the Acting Surgeon General of the United States Public Health Service, inclosed herewith.

I concur in the necessity for these appropriations.

Respectfully,

CARTER GLASS, *Secretary.*

THE SPEAKER OF THE HOUSE OF REPRESENTATIVES.

TREASURY DEPARTMENT,
BUREAU OF THE PUBLIC HEALTH SERVICE,
Washington, November 28, 1919.

SIR: I desire to invite your attention to an appropriation of $20,000, contained in the sundry civil bill for the fiscal year ending 1920, for the purchase of equipment and furniture for the additional buildings of the Hygienic Laboratory. The original estimate, made when prices were much less than they are to-day, was for $50,000. The $20,000 already appropriated has only been adequate to equip a small portion of the new building. In view of increased laboratory work being done by the service, the building is urgently needed for full occupancy.

Early in the present fiscal year an item of $30,000 for the purchase and installation of this equipment and furniture was transmitted to the Senate for inclusion in the first urgent deficiency bill, which at that time had passed the House and was under consideration in the Senate. The item reached the Senate, however, too late to be included in the bill.

I therefore have the honor to request that this item be resubmitted for inclusion in the next deficiency bill. The building will necessarily stand practically useless until an additional appropriation is made. Even if the $30,000 is appropriated it will be only by the employment of the strictest economy that it will be possible to supply adequate equipment, but there is no intention of increasing the original estimate.

Respectfully,

J. C. PERRY,
Acting Surgeon General.

The SECRETARY OF THE TREASURY.

Deficiency estimate of appropriation required for the service of the fiscal year ending June 30, 1920, by the Public Health Service.

TREASURY DEPARTMENT APPROPRIATION FOR POSTAGE.

LETTER

FROM

THE SECRETARY OF THE TREASURY,

TRANSMITTING

A SUPPLEMENTAL ESTIMATE OF APPROPRIATION, REQUIRED FOR POSTAGE FOR THE TREASURY DEPARTMENT, FISCAL YEAR 1920, ADDITIONAL TO THE SUM PROVIDED IN THE LEGISLATIVE APPROPRIATION ACT OF MARCH 1, 1919.

DECEMBER 1, 1919.—Referred to the Committee on Appropriations and ordered to be printed.

TREASURY DEPARTMENT,
OFFICE OF THE SECRETARY,
Washington, December 1, 1919.

SIR: I have the honor to transmit herewith for the favorable consideration of Congress a supplemental estimate of appropriation, in the sum of $1,200, required for postage for the Treasury Department, fiscal year 1920, additional to the sum of $1,200 provided in the legislative appropriation act of March 1, 1919.

The necessity for the appropriation is explained in the letter of the Chief of the Division of Printing and Stationery herewith.

Respectfully,

CARTER GLASS, *Secretary.*

The SPEAKER OF THE HOUSE OF REPRESENTATIVES.

TREASURY DEPARTMENT,
OFFICE OF THE SECRETARY,
DIVISION OF PRINTING AND STATIONERY,
Washington, November 7, 1919.

SIR: I have the honor to ask that a deficiency of $1,200 be requested of Congress for postage for the Treasury Department for the current fiscal year. The current appropriation "For postage required to prepay matter addressed to Postal Union countries, and

for postage for the Treasury Department" is $1,200. Expenditures up to this time indicate that a total for the year will be required of $2,400.

As a reflex of the World War the correspondence of the department has very greatly increased—probably trebled—and the foreign mailing of publications has also increased in large proportions. The deficiency asked is a conservative estimate, and it is not believed that the business of the department can be conducted with a less amount than that requested.

Respectfully,

F. F. WESTON,
Chief Division of Printing and Stationery.

The SECRETARY OF THE TREASURY.

1. Referring to your letter of July 9, 1919, on the above subject, I have to advise you that the only moneys received in this office during the fiscal year 1919 which have not been deposited into the General Treasury of the United States are as follows:

Check of adjutant general of Washington, on the Dexter Horton National Bank of Seattle, in the sum of $137.31.

Check of adjutant general of Washington, on the Dexter Horton National Bank of Seattle, in the sum of $32.48.

Check of adjutant general of Washington, on the Dexter Horton National Bank of Seattle, in the sum of $14.65.

2. The three checks of the adjutant general of Washington cover refundment for lost property and are being held in this office pending the receipt of necessary reports of survey, as required by the act of June 3, 1916. The post office money order was forwarded to this office to cover the value of lost property, but was insufficient to cover the total value of the property lost and the authorities of the State of Tennessee have been called upon to remit the balance.

TREASURY DEPARTMENT,
OFFICE OF THE SECRETARY,
Washington, December 1, 1919.

The SPEAKER OF THE HOUSE OF REPRESENTATIVES.

SIR: I have the honor to transmit herewith for the favorable consideration of Congress a supplemental estimate of appropriation, in the sum of $35,400, required for additional clerical force for the office of the Auditor for the Treasury Department, fiscal year 1920.

The necessity for the appropriation is fully set forth in the letter of the Auditor for the Treasury Department and accompanying papers herewith.

TREASURY DEPARTMENT,
OFFICE OF AUDITOR FOR TREASURY DEPARTMENT,
Washington, November 25, 1919.

The SECRETARY OF THE TREASURY
(Through the Comptroller of the Treasury).

SIR: I have the honor to transmit herewith an estimate for a deficiency appropriation for the last half of the fiscal year 1920 for the use of the office of the Auditor for the Treasury Department.

The amount desired is requested in the form of a lump-sum appropriation of $35,400, and the uses to which it is intended to be put are set out in the estimate in detail.

The above sum is needed to provide additional employees in the War Risk Insurance Division of the office to replace employees who have, while still badly needed, been dropped because of lack of appropriation, and to provide additional employees in the Rate Section of the office, where the work has increased in a measure out of all proportion to the force engaged.

Attached hereto are two memorandums marked, "Exhibit A" and "Exhibit B," showing the situation in more detail in those two sections of the office.

Respectfully,

SAML. PATTERSON, *Auditor.*

Approved.

Total claims settled by above clerks in that period 20,248

For the first month of the above 22 months period there were 645 claims received by 7 clerks; for the last month there were 3,092 claims received by 12 clerks, an increase in the claims of over 479 per cent, while there was an increase in the force of only 171.4 per cent.

The increase in the number of claims received is only a small part of the actual increase, however, as a careful examination has shown that the volume of each claim has increased 250 per cent. The average number received per month for the first six months period was 809.16, and this increased to 951.83 for the second six months, an increase of 117.6 per cent. This average increased in turn for the third six months period to 1,663.5, an increase of 174.76 per cent over the previous period, and for the last period of four months this average has again increased to 2,217.5, or an increase of 133.3 per cent.

The average number of claims settled per clerk per month has varied from 98.7 per cent for the first period to 115.34 for the last period.

If the percentage increase in the number of claims received continues, as for the last four months period, the number of claims which should be received in the next four months may be arrived at by multiplying the number received during the last period by 133.3, which results in the following: 8,870×133.3=11,823.7; multiplying this number by the same ratio of increase, the result shows that 15,761 claims should be received during the second four months period, which would give the total number of claims to be acted on during the remainder of the fiscal year as 11,823.7, 15,761, and 10,574, or a total of 38,158. Dividing the latter number by 107.7, the average number of claims settled per clerk for the entire period above, and the result shows that 354 clerks would be required to do the work in one month.

As it is a practical certainty that the increase requested will not be available for two months, to get at the number of clerks actually required for the next six months, from January 1, 1920, to June 30, 1920, we will deduct the 12 clerks for eight months, now available, or 96 clerks for one month, from the total of 354 as shown above, and the result, 258 clerks for one month, or 43 clerks for the remaining six months, will be the number of clerks actually required to get this work current by June 30 next.

The above estimate of 43 clerks required is undoubtedly too conservative rather than excessive, for the following reasons, viz:

First. The greatest increase in the claims received, both as to numbers and volume, has been in the last few months and will undoubtedly continue, so that the ratio of increase used is too small.

Second. The number of clerks requested is for a six months period, whereas if granted they will in all probability not be available for more than a four months period.

Third. If the appropriation is granted and the employees are actually secured, they will be untrained and will probably be less than 50 per cent efficient for the first four months.

EXHIBIT B.

Statement of war risk insurance and public debt interest checks now on hand and estimate of the number that will be received before June 30, next, in the War Risk Insurance Division of the Auditor for the Treasury Department.

War Risk Insurance checks now on hand, unassorted	5,642,830
Interest checks now on hand, unassorted	3,159,885
Total now on hand unassorted	8,802,715
Estimated receipts:	
War Risk Insurance checks	2,631,000
Interest checks	3,600,000
Total estimated receipts	6,231,000
Grand total	15,033,715

The above checks are assorted by two different sections, receiving first what is termed a preliminary sort, after which they are balanced with the figures submitted by the Treasurer of his daily clearances. When this proof has been made, they are assembled for filing, but before being placed in the file, a search is made for checks on which payment has been stopped. There are, all told, about 15,000 stop-payment orders now in the office.

Digitized by Google

When this search has been completed, the checks are filed in what is known as the working, or temporary, file, making them available for searching to furnish information to a large number of divisions of the War Risk Bureau, the Department of Justice, the Treasurer of the United States, the Division of Loans and Currency and thousands of individuals.

These checks are held in the working file only until such time as a reconciliation of the disbursing officer's balance with the balance as shown by the Treasurer is made. Just prior to this reconciliation the final sort is made, which runs them down to strict numerical order, inserting cards in place of all outstanding checks.

In making the reconciliation statement, all outstanding checks are listed by number and amount, after which the checks are transferred to what is termed the permanent file, where they are continually being searched for information to be furnished the offices and individuals before spoken of.

In the case of making the first proof, very often it is hard to strike a balance, and when addition alone will not suffice it is necessary to throw the checks back to their original form and check the items against the bank schedules which are submitted by the Treasurer with the checks. This necessarily takes considerable time, as the checks have to be reassorted and readded after the item or items of difference have been located.

It also takes considerable time to handle what we call prior issues, that is, checks which have been issued prior to the month which we are reconciling, but paid along with current issues. These checks have to be canceled from the detailed outstanding list and a new balance made of this list, the checks themselves being run into the permanent file and the cards removed.

There are now 26 calculating-machine operators working on this work, who are adding at the rate of 1,625,000 checks per month. Taking this as a basis, it will require an increase of four operators in the computing section.

The preliminary assorting section is averaging about 2,000 checks a day per clerk and the final assorting section about 3,000 checks a day per clerk, which makes a daily average of the complete assortment of 1,200 checks per clerk. Using this as a working basis, it will require 32 clerks to make the assortment. Fifteen clerks will be needed for revising and preparing the work and not less than five clerks will be needed for work of a miscellaneous nature, such as throwing checks back to their original form to locate errors, running in of prior issues, etc. This would make it necessary to carry in both preliminary and final assorting sections 52 clerks known as check assorters.

It is necessary to have at least 30 clerks in the files section to search and furnish information.

The assembling section will have to be increased from its present force of three to four clerks.

The following table will give you the increase necessary in each section to bring this work current at the end of the fiscal year:

	Present force.	Rate of pay.	Increased force.	Rate of pay.	Amount of increase.

The SECRETARY OF THE TREASURY.

SIR: The commission has the honor to transmit a deficiency estimate of $20,000 for printing and binding for the current fiscal year.

After the signing of the armistice the commission submitted a revised conservative estimate of $90,000 for 1920, a reduction of

$35,000 from its original estimate of $125,000. An appropriation of only $70,000 was granted, which it can be foreseen at this time is inadequate, as for the first four months of this year the estimated charges against this appropriation on requisitions drawn on which deliveries are incomplete, approximate $34,000 or on a yearly basis of $102,000.

In view of the condition of the appropriation and estimated needs for the remainder of the year, the commission feels that the full amount of $90,000 according to its revised estimate will be essential, and earnestly requests that the $20,000 now asked be appropriated.

By direction of the commission.

DEFICIENCY ESTIMATE—PUBLIC HEALTH SERVICE.

LETTER

FROM

THE SECRETARY OF THE TREASURY,

TRANSMITTING

DEFICIENCY ESTIMATE OF AN APPROPRIATION REQUIRED BY THE UNITED STATES PUBLIC HEALTH SERVICE FOR AN EXPENDITURE DURING THE PERIOD FROM FEBRUARY 1 TO JULY 1, 1920.

DECEMBER 1, 1919.—Referred to the Committee on Appropriations and ordered to be printed.

TREASURY DEPARTMENT,
OFFICE OF THE SECRETARY,
Washington, November 29, 1919.

The SPEAKER OF THE HOUSE OF REPRESENTATIVES.

SIR: I have the honor to transmit for the action of Congress a deficiency estimate of an appropriation required by the United States Public Health Service for an expenditure during the period from February 1 to July 1, 1920, as follows:

To regulate the propagation and sale of viruses, serums, toxins, and analogous products (including arsphenamine and allied preparations), and for the preparation of curative and diagnostic biologic products, including personal service, $25,000.

Although $100,000 was requested in the estimates for the fiscal year 1920 for the administration of the law of July 1, 1902, regulating the manufacture and sale of biological products, but $35,000 was appropriated. The action necessary to the enforcement of this law will exhaust this appropriation by February 1, 1920. By exercise of the strictest economy, $25,000 additional will enable the Public Health Service to adequately enforce the law through the remainder of the fiscal year.

The unfortunate results of any failure to enforce the law are fully set forth in a letter from the Surgeon General of the United States Public Health Service, which is inclosed. The need for this deficiency appropriation is therefore urgent, and I would respectfully ask the Congress to make the necessary provision therefor.

Respectfully,

CARTER GLASS, *Secretary.*

TREASURY DEPARTMENT,
BUREAU OF THE PUBLIC HEALTH SERVICE,
Washington, November 28, 1919.

The honorable the SECRETARY OF THE TREASURY.

SIR: The annual estimate submitted to Congress for the fiscal year 1920 for carrying out the provisions of the act of July 1, 1902, regulating the sale of viruses, serums, toxins, and analogous products, was $100,000. The appropriation granted by Congress was $35,000.

This sum has been found to be wholly inadequate to enable the United States Public Health Service to discharge what must be regarded as one of its most important administrative duties, namely, to see that all biologic products for human administration placed on the market for interstate sale are subjected to such supervision and examination as will prevent their being contaminated or below the proper standard of potency. The need for an increase in the appropriation for this purpose is due partly to the fact that the scope of work is constantly becoming greater and because of the increase in both the number of manufacturers and the number of products of this character placed on the market. Furthermore, during the war the supervision of arsphenamine, neoarsphenamine, and similar preparations for the treatment of venereal diseases was suddenly placed on the Public Health Service. At first the additional expense due to the supervision of the production of arsphenamine and allied preparations and to the general increase in the manufacture of biologic products was borne by special war funds which are no longer available. The supervision of arsphenamine and allied preparations is now regarded as coming under the biologic law. Some five or six million doses of these products are consumed annually in this country. Consequently, the proper supervision of their manufacture and the testing of samples is a task of great magnitude. The control and testing of these drugs require the highest class of work. It is imperative that every batch of the products made by each manufacturer be tested chemically and pharmacologically at the Hygienic Laboratory prior to the release of the products in interstate traffic. The possibilities involved in the release of inferior lots of the drugs are so grave that any method of control short of this could not be countenanced.

Although it would facilitate the enforcement of the biologic law greatly if $100,000 had been appropriated as estimated, it has been determined by a careful consideration of all the factors involved that the sum imperatively necessary for carrying out the required supervision and control in regard to biologic products for the present fiscal year is $60,000. Of this amount, approximately $42,000 is for salaries, $13,000 for animals, including feed, forage, and cages, $2,000 for travel expenses, and $3,000 for apparatus. Of this $60,000, but $35,000 has been appropriated by Congress.

In view of the fact that the enforcement of the biologic law is mandatory on the United States Public Health Service, it would appear that the appropriation in question is excepted in section 3679 of the Revised Statutes as amended March 3, 1905 (c. 1484, sec. 4, 33 Stat., 1257), and February 27, 1906 (c. 510, sec. 3, 34 Stat., 48), directing that the expenditure of certain appropriations shall be controlled by quarterly allotments. The department has concurred in this opinion and has authorized the bureau to expend the original

Digitized by Google

appropriation as necessary, regardless of quarterly allotments. This would mean that the appropriation would be exhausted about February 1, 1920. Necessary expenditures have been made in accordance with this understanding. It has become quite manifest that the $35,000 is entirely inadequate and that it will be exhausted at least by February 1, 1920.

It, therefore, becomes necessary to request a deficiency appropriation to make possible the carrying out of the provisions of the biologic law for the period from February 1 to July 1, 1920. In accordance with the estimate given above, the sum imperatively needed is $25,000. With a less amount the service would be without the necessary funds to enforce this act. Any omission of the enforcement of this act would at once expose the public to grave dangers resulting from an unsupervised supply of biologic products now effectively controlled by this act. Among these dangers might be mentioned (1) the presence of the living germs of tetanus and other disease-producing bacteria in smallpox virus, diphtheria antitoxin, and other biologic products; (2) arsphenamine and neoarsphenamine of such toxicity as to cause sudden death when injected for purposes of cure; (3) sera of various kinds so far below the standards of potency set by the United States Government as to fall far short of producing their specific results and thus, perhaps, cause loss of life instead of cure. In short, the absence of control by the Public Health Service over the manufacture and sale of biologic products will paralyze the action of what must be regarded as one of the most direct and scientific measures for safeguarding the public health yet provided by Congress.

I, therefore, transmit herewith for submission to Congress, to be included in the next deficiency bill, an item for an appropriation of $25,000 to continue the enforcement of the law of July 1, 1902, from February 1 to the end of the fiscal year, i. e., June 30, 1920.

Respectfully,

J. C. PERRY,
Acting Surgeon General.

Control of Biologic Products—

Sir: I have the honor to transmit herewith for the favorable consideration of Congress a communication from the Surgeon General, Public Health Service, of the 21st ultimo, submitting a paragraph of legislation for inclusion in the next deficiency bill to be reported to Congress, the object of which is to authorize the payment of certain bills for advertising, in the sum of $2,894, incurred without written authority of the head of the department, as required by law.

The necessity for the legislation asked is fully set forth in the letter of the Surgeon General, Public Health Service, herewith.

TREASURY DEPARTMENT,
BUREAU OF THE PUBLIC HEALTH SERVICE,
Washington, November 21, 1919.

The honorable the SECRETARY OF THE TREASURY,
Washington, D. C.

SIR: I have the honor to recommend that the following provision be included in the estimate of appropriations required to supply urgent deficiencies in appropriations for the fiscal year ending June 30, 1920:

The Secretary of the Treasury is hereby authorized to pay, out of the unexpended balance of the sum of $1,000,000, appropriated by the joint resolution of October 1, 1918, to aid in combating "Spanish" influenza and other communicable diseases, the bills of the proprietors of certain newspapers published in Chicago, Ill., for the publication of a notice giving warning against influenza on October 3, 1918, as follows: The Chicago Tribune, $600; the Evening Post, $366; the Daily Journal, $366; the Herald-Examiner, $448; the Evening American, $504; the Daily News, $610; in all, $2,894.

The joint resolution making the appropriation for combating "Spanish" influenza, etc., was approved October 1, 1918. The Public Health Service had already prepared for general distribution a leaflet containing information respecting the prevalence, symptoms, prophylaxis, etc., of influenza. Influenza being at the time alarmingly prevalent in Chicago, an order was given for the publication of the contents of this leaflet in six Chicago newspapers of wide circulation. That this action was judicious is shown by the relatively low incidence of influenza in Chicago.

In the haste of the moment, while the bureau was assailed from all sides with demands for aid against influenza, the existence of a statute requiring the written authority of the head of the department for the publication of notices in newspapers (sec. 3828, Revised Statutes) was overlooked. This statutory requirement was, however, recalled very soon after the order was given, and the order was at once countermanded by telegraph; this action, however, was taken too late to prevent the publication.

Upon looking into the question of the possibility of the payment of the bills on the written ratification of the department, the bureau found that the Comptroller of the Treasury had held that the written authorization must be given before publication. (5 Comp. Dec., 166.) It appears, therefore, that the bills can not be paid without special authority from Congress. In view of all the circumstances of the case, I earnestly recommend that such authority be given.

The bills, if payment is authorized, will be a charge against the unexpended balance of the appropriation, which amounts to about $160,000.

Respectfully,

RUPERT BLUE,
Surgeon General.

THE SECRETARY OF THE TREASURY,

TRANSMITTING

A DEFICIENCY ESTIMATE OF APPROPRIATION REQUIRED BY THE PUBLIC HEALTH SERVICE FOR THE FISCAL YEAR ENDING JUNE 30, 1920.

DECEMBER 1, 1919.—Referred to the Committee on Appropriations and ordered to be printed.

TREASURY DEPARTMENT,
Washington, November 19, 1919.

SIR: I have the honor to transmit herewith for the consideration of Congress a deficiency estimate of an appropriation required by the Public Health Service for the fiscal year ending June 30, 1920, as follows:

For medical, surgical, and hospital services and supplies for war-risk-insurance patients and other beneficiaries of the Public Health Service, including necessary personnel, regular and reserve commissioned officers of the Public Health Service, clerical help in the District of Columbia and elsewhere, maintenance, equipment, leases, fuel, lights, water, printing, freight, transportation and travel, maintenance and operation of passenger motor vehicles, and reasonable burial expenses (not exceeding $100 for any patient dying in hospital), $6,000,000: *Provided, however*, That officers of the Public Health Service may purchase subsistence supplies and articles of serviceable property for the use of themselves and their families from the Army, Navy, and Marine Corps, at the same price as is charged officers of the Army, Navy, and Marine Corps; and the Secretary of the Treasury is hereby authorized to make regulations governing the disposal of articles produced by patients in the course of their curative treatment either by allowing the patient to retain same or by selling the articles and depositing the money received to the credit of the appropriation from which the materials for making the articles were purchased; and the Secretary of the Treasury is hereby authorized and directed to request the Secretary of any other department of the Government to transfer to the Treasury Department equipment and supplies of any kind whatsoever, which may be in excess of their needs, and the Secretary of any other department of the Government is authorized and directed to furnish the Secretary of the Treasury upon request with lists of supplies and equipment in excess of their needs, before offering the same for sale, and to transfer

such supplies or equipment as may be required, to the Secretary of the Treasury for the use of the United States Public Health Service, without charge, as may be deemed to be in the interests of the Government.

The necessity for this appropriation is fully set forth in the letter of the Surgeon General of the Public Health Service inclosed herewith.

Respectfully,

CARTER GLASS, *Secretary.*

THE SPEAKER OF THE HOUSE OF REPRESENTATIVES.

TREASURY DEPARTMENT,
BUREAU OF THE PUBLIC HEALTH SERVICE,
Washington, October 31, 1919.

The honorable the SECRETARY OF THE TREASURY,
Washington, D. C.

(Division of Bookkeeping and Warrants.)

SIR: I have the honor to submit herewith an estimate of appropriation, in amount $6,000,000, with request that the same be submitted to Congress for action. This sum is desired to supplement the sum of $4,000,000 provided in the sundry civil act, approved July 19, 1919, for the purpose of providing medical, surgical, and hospital service and supplies for war-risk insurance patients and other beneficiaries of the Public Health Service, during the fiscal year 1920, and the appropriation is known as "Pay of personnel and maintenance of hospitals, Public Health Service, 1920."

A very careful estimate has been made from the information available, and it is quite evident that the total sum of $10,000,000 will be required during the fiscal year ending June 30, 1920, in providing the service indicated.

The additional provision in the estimate here submitted refers to the privilege desired for officers of the Public Health Service to purchase subsistence supplies and articles of serviceable property for their personal and family use from the Army, Navy, and Marine Corps; to regulations governing the disposal of articles produced by patients in the course of their curative treatment; and to the transfer, without cost to the Treasury Department, of surplus supplies from other departments.

It is desired that officers of the Public Health Service may have the same privilege of purchasing subsistence supplies, etc., for the use of themselves and their families from the Army, Navy, and Marine Corps, as is granted to officers of the organizations mentioned. The salaries paid officers of the Public Health Service are not any higher than those paid to officers of the organizations named who have this privilege, and it is deemed just and proper that the privilege should be granted alike to all persons employed in similar classes of work.

It is desired that the Secretary of the Treasury may be in a position to encourage patients in the course of their curative treatment, by allowing them to retain at least some of the articles produced by them. The regulations will be so modeled as to give the greatest incentive to the patients with the least expense to the Government. Such articles as are not otherwise disposed of should be sold, and a provision for such action is included.

Digitized by Google

It is desired that the Treasury Department may be furnished with such material and equipment as may not be needed by other departments, and a provision for such transfer is included, it being deemed very much more advantageous to the Government to transfer supplies and equipment in this manner than to dispose of the same to the public.

Respectfully,

RUPERT BLUE, *Surgeon General.*

S. Public Health Service, without charge, as may be deemed to be in the interest of the Government. (Acts Aug. 14, 1912, vol. 37, p. 309, sec. 1; July 19, 1919, vol. 41, p. 175, sec. 1.)

66TH CONGRESS, 2d Session. } HOUSE OF REPRESENTATIVES. { DOCUMENT No. 364.

CLAIMS ADJUSTED UNDER WAR CONTRACTS ACT.

LETTER

FROM

THE ACTING SECRETARY OF WAR,

TRANSMITTING

REPORT TO CONGRESS OF CLAIMS ADJUSTED UNDER ACT OF CONGRESS APPROVED MARCH 2, 1919.

DECEMBER 1, 1919.—Referred to the Committee on Expenditures in the War Department and ordered to be printed.

WAR DEPARTMENT,
OFFICE OF THE ASSISTANT SECRETARY,
DIRECTOR OF MUNITIONS,
Washington, D. C., November 29, 1919.

Hon. FREDERICK H. GILLETT,
Speaker of the House of Representatives,
Washington, D. C.

MY DEAR MR. SPEAKER: Pursuant to the provisions of section 1 of the act of Congress approved March 2, 1919, entitled "An act to provide relief in cases of contracts connected with the prosecution of the War, and for other purposes," I transmit herewith to the Congress a report in the form of a detailed statement of the agreements paid and adjusted under section 1 of said act, together with a statement of the nature, terms, and conditions of such agreements.

These statements are transmitted in 11 file cabinets and in 3 bound volumes, the contents of which are summarized in tabulated form in the accompanying volume, entitled "Report to Congress of claims adjusted under act of Congress approved March 2, 1919." The data furnished constitutes a complete report of adjustments made up to November 1, 1919.

As of that date there remained before the several claims boards 2,185 agreements not then adjusted or only partially paid or adjusted, as well as approximately 2,700 claims in which the existence or terms of the alleged agreements had not yet been determined. These are not included in this report. Certain of the pending agreements have

been finally adjusted since November 1, and I shall have occasion at a later date to report to the Congress the further progress of this work.

Referring to the preliminary statement on page 1 of this report, I invite your attention to the fact that, for the most part, the very large total of payments for articles completed and delivered to the United States, aggregating more than $1,000,000,000, consists of expenditures made during the period of hostilities and at various times prior to March 2, 1919, under agreements not executed in the manner prescribed by law. On account of the informality of such agreements it was deemed advisable to include such expenditures in their adjustment, even though such payments had in fact been made at an earlier date, both before and after the termination of hostilities.

Very truly, yours,

BENEDICT CROWELL,
Acting Secretary of War.

REPORT TO CONGRESS PURSUANT TO SECTION 1 OF ACT OF CONGRESS APPROVED MARCH 2, 1919, ENTITLED "AN ACT TO PROVIDE RELIEF IN CASES OF CONTRACTS CONNECTED WITH THE PROSECUTION OF THE WAR, AND FOR OTHER PURPOSES."

[Data reported as of Nov. 1, 1919.]

This report contains on page 2 a summary statement of separate awards made under the above entitled act accompanied by a more detailed statement on pages 3 to 81 as to each such award. Further accompanying the report in file cabinets numbered 1 to 11 are papers which contain a detailed statement of the nature, terms, and conditions of each agreement paid or adjusted by such award, and the terms and conditions of such payment and adjustment.

On pages 82 and 83 is presented a summary statement as to certain payments for completed articles delivered and services rendered to the United States under certain agreements not executed in the manner prescribed by law, performance of which was not curtailed. Accompanying the report are volumes 1, 2, and 3, entitled "Report of payments made on agreements not terminated." These volumes contain a detailed statement of the nature, terms, and conditions of such agreements and of the payments thereunder.

Recapitulation of payments approved under section 1 of the act of Mar. 2, 1919.

Total amounts approved for payment to claimants in compensation for expenditures and obligations incurred by them under agreements not executed in the manner prescribed by law, such expenditures and obligations not resulting in a delivery to the United States of completed articles under the agreements by reason of the curtailment of production at the request of the United States	$126,896,442.13
Total payments approved for completed articles delivered and services rendered to the United States during and after hostilities under agreements not executed in the manner prescribed by law at the prices and on the terms fixed by such agreements	1,055,189,426.56

STATEMENT OF PAYMENTS FOR COMPLETED ARTICLES UNDER CERTAIN AGREEMENTS NOT CURTAILED.

The contents of Volumes I, II, and II (Report of payments made on agreements not terminated) comprise a record of payments made under certain fixed price agreements not executed in the manner prescribed by law, for completed products delivered or services rendered to the United States during and after hostilities at the unit prices and on the terms specified in such agreements, and do not

Digitized by Google

include any compensation paid by reason of a curtailment of the original agreement, deductions having been made for delinquencies or other causes which would have been made had such agreements been executed in the manner prescribed by law.

These data setting forth the nature, terms, and conditions of these agreements and the payment or adjustment thereof, have been compiled in accordance with the following resolution of the War Department Claims Board adopted May 9, 1919, and contain a record of payments covered by this resolution:

Resolved—1. The War Department Claims Board hereby finds that where articles, work, or services are delivered to and accepted by the United States pursuant to any fixed-price agreement which was not executed in the manner prescribed by law, and which is within the act of Congress of March 2, 1919 (which agreements are hereinafter called informal agreements), the payment, adjustment, and discharge of that agreement on a fair and equitable basis will include, in addition to such amounts, if any, as may be allowed on account of the suspended or terminated portion of such agreement, if a portion thereof was suspended or terminated, the payment for the articles, work, or services delivered and accepted at the price and on the terms specified in such informal agreement less such deductions for delinquencies, advances, or other causes as would have been made had such agreement been executed in the manner prescribed by law.

2. Disbursing officers are hereby authorized and instructed to pay for articles, work, or services delivered and accepted under any such informal fixed-price agreement at the price and in accordance with the terms of such agreement, but in making such payments, deductions must be made for delinquencies, advances, or other causes to the same extent and in the same manner as if the agreement had been executed in the manner prescribed by law.

3. The foregoing payments must be limited strictly to articles, work, or services actually delivered and accepted under any such informal fixed-price agreement, and must include nothing on any claims for compensation on account of that portion of any such informal agreement which may have been suspended, terminated, or canceled. Claims for compensation on the uncompleted portion of any such informal agreement must be fixed by a specific award of the War Department Claims Board, and may be paid only on such awards.

4. No informal agreement is within the act of Congress of March 2, 1919, unless it was made between April 6, 1917, and November 12, 1918, by an officer or agent acting under the authority, direction, or instruction of the Secretary of War or of the President, and unless it was performed in whole or in part, or expenditures were made or obligations incurred upon the faith of the agreement prior to November 12, 1918.

The foregoing resolution shall not be construed to authorize payments where the defectively executed contracts, excessive or unlawful purchase order, or procurement order was made subsequent to November 11, 1918.

5. In addition to the weekly reports furnished by finance managers and disbursing officers to the Settlements Division, Office of the Director of Finance, the officers now furnishing such reports shall also furnish weekly reports of all payments made in accordance with the terms of this resolution. Said reports will show:

(*a*) The name of the contractor.
(*b*) The number of the informal contract, purchase order, or procurement order.
(*c*) The date of the informal contract, purchase order, or procurement order.
(*d*) The kind of article, work, or service delivered.
(*e*) The unit price or other terms of payment named in the informal contract, purchase order, or procurement order.
(*f*) The amount of payment.
(*g*) Statement whether payment is the final payment under the informal contract, purchase order, or procurement order.
(*h*) Statement whether any portion of the informal contract, purchase order, or procurement order has been suspended or terminated.
(*i*) Total of all previous payments made under the informal contract, purchase order, or procurement order.
(*j*) Total amount of deductions for delinquencies, advances, or other causes made under the informal contract, purchase order, or procurement order.

6. Appropriate blanks will be furnished to finance officers for these reports.

DECEMBER 2, 1919.—Referred to the Committee on Indian Affairs and ordered to be printed.

DEPARTMENT OF THE INTERIOR,
Washington, December 1, 1919.

SIR: In compliance with the provisions of the act of August 1, 1914 (38 Stat. L., 582–586), I have the honor to transmit herewith a detailed report of the expenditures made for the purpose of encouraging industry among the Indians of the various reservations during the fiscal year ended June 30, 1919, from the appropriation, "Industry Among Indians, 1918–19."

DISPOSITION OF USELESS PAPERS, DEPARTMENT OF AGRICULTURE, 1919.

LETTER

FROM

THE SECRETARY OF AGRICULTURE,

TRANSMITTING

REPORT ON USELESS PAPERS DISPOSED OF FOR THE FISCAL YEAR 1919.

DECEMBER 3, 1919.—Referred to the Committee on Disposition of Useless Executive Papers and ordered to be printed.

DEPARTMENT OF AGRICULTURE,
Washington, December 1, 1919.

SIR: Referring to the report required by the act 25, Statute at Large, page 672, on the condition and character of any papers not needed or useful in the transaction of the current business of the Executive departments, and the amount of proceeds from the sale of such papers deemed useless, your attention is called to the following provision applicable to the Department of Agriculture:

> And hereafter the Secretary of Agriculture is authorized to sell as waste paper, or otherwise to dispose of the accumulation of department files which do not constitute permanent records, and all other documents and publications which have become obsolete or worthless. (34 Stat. L, p. 1281.)

Under this provision, the proper officer of the Department of Agriculture, upon specific authority from the Secretary of Agriculture, has from time to time destroyed certain accumulations of department files which did not constitute permanent records and which it was not deemed advisable to sell or otherwise dispose of.

Waste paper from baskets and other sources, not destroyed, and of department files which do not constitute permanent records, together with documents and publications which have become obsolete or worthless, has been sold to the highest bidder. For the fiscal year 1919, the receipts from this source amounted to $571.17, and this amount has been deposited in the Treasury to the credit of miscellaneous receipts.

Respectfully,

D. F. HOUSTON, *Secretary.*

APPROPRIATION FOR COLLECTING REVENUE FROM CUSTOMS, TREASURY DEPARTMENT.

LETTER

FROM

THE SECRETARY OF THE TREASURY,

TRANSMITTING

AN ESTIMATE OF THE APPROPRIATION FOR DEFRAYING THE EXPENSES OF COLLECTING THE REVENUE FROM THE CUSTOMS FOR THE FISCAL YEAR ENDING JUNE 30, 1921.

DECEMBER 3, 1919.—Referred to the Committee on Appropriations and ordered to be printed.

TREASURY DEPARTMENT,
Washington, November 28, 1919.

SIR: In accordance with the provisions of section 5 of the act of August 5, 1882 (22 Stat. L., 256), I have the honor to transmit herewith an estimate of the appropriation for defraying the expenses of collecting the revenue from customs for the fiscal year ending June 30, 1921.

The statement contained in this estimate specifies the number and class of officers and employees of every grade and nature, with rates of compensation, which, in my judgment, will be necessary to properly conduct the business of collecting the revenue from customs at each port of entry in the United States; also the amounts required for such contingent expenses of the service as can not otherwise be specifically provided for.

Respectfully,

CARTER GLASS, *Secretary.*

The SPEAKER OF THE HOUSE OF REPRESENTATIVES.
